Slate, saltillo, limestone, travertine and concrete floors.

## High Gloss Finishing Sealer

Water-based, low-VOC, low-odor formula provides a brilliant shine and protects against water- and oil-based stains.

### Features and Benefits:

- Two-in-one formula leaves a wet-look finish and protects against stains
- Easy-to-use, water-based formula
- Interior use

### Where to Use:

Slate, saltillo, limestone, travertine and concrete floors.

# SASSO BELLO

## BEFORE

Sasso Bello's Perfect Colorant System uses a 4-step process to revitalize your stone or tile surfaces. This process not only restores your tile to their original beauty, but with its fungicides, bactericides and mildicides built into our system it insures sanitation for many years.

Grout Coloring has many benefits:

- It can change the entire look and feel of tiled surface.
- It can be an excellent alternative to re-grouting when existing grout cannot be cleaned because of a deep stain or other damage.
- It can be used to seamlessly match a new installation to that of an existing installation.
- It provides a superior barrier to future stains, oils and other contaminates.

Sasso Bello's Grout Colorant System is an epoxy-based formula that is extremely durable and will provide superior protection to that of any impregnator sealer on the market. Available in practically ANY color, grout colorant is indistinguishable from natural grout, except for the undeniable fact that it repels dirt and stains much better.

## AFTER

## GROUT COLORANT

# SASSO BELLO

**BEFORE**

**UNSEALED**

All stone is porous to some degree. Protect your natural stone and prevent stains with Sasso Bello's Professional sealers. The good news is once treated, the advanced formula delivers protection to ensure your natural stone is ready for everyday use. People often assume that natural stone is "stain-proof," however all stone is porous to some degree. If not properly treated with a protective sealer, water, oils or other liquids can easily penetrate the stone, leaving behind unwanted stains.

**BEFORE**

**AFTER**

**SEALED**

**Product Description:** A unique water-based, V.O.C. compliant impregnator sealer, which penetrates grout, stone and masonry surfaces to protect against water and oil staining while allowing substrate to properly breath. Non-yellowing, long lasting. Will not change surface appearance. Will not alter proper cure time on new grout.

**AFTER**

# SASSO BELLO

**Dull**

## HONED

Restoration of a honed finish involves using a series of diamond abrasives up until the desired finish is achieved. In addition, restoration at this level will remove minor to moderate scratches and etch marks.

**Semi Polish**

**800**

Natural stone reflects light and does not need a topical coating or wax to achieve this desired finish. This is followed by careful polishing techniques that can only be learned from experience.

**Medium Polish**

**1600**

When stone surfaces wear and display traffic patterns, the polish can be restored using a series of diamond grits. This process will:

- Refresh the original color of the floor
- Improve its resistance to stains and watermarks.

**High Polish**

**3200**

Sasso Bello's Polishing System: a polishing progression of higher grit series and compounds to simulate a higher gloss for a very enlightening shine.

## AFTER

Grout joints will typically begin to deteriorate and discolor in the tub or shower area over a period of time while your tiles themselves never lose their original beauty and shine. Sasso Bello's process of grout removal and replacement will give you that "new" look at a fraction of the cost of replacement.

Sasso Bello's technique of regrouting tile is the most effective, professional and BEST way to regROUT. Our system will not only improve the appearance of your kitchen counter, vanity, tub surround, or shower stall but it will ensure a lasting finish for years to come.
